A REGENCY PERIOD X-FRAME STOOL POSSIBLY BY GEORGE BULLOCK

H: 17.5 in / 44 cm | W: 21.5 in / 55 cm | D: 18 in / 45 cm

A Regency Period X-Frame Stool

Possibly by George Bullock

Constructed from indigenous oak--a wood typically used by the renowned cabinetmaker George Bullock--this stool of elegant proportions supported on x-frame supports carved with lotus ends and joined by a baluster stretcher. The dished seat with reeded cylinder terminals.

English, Circa 1815
