A Circular Regency Dining Table of Impressive Size

The expanding table of circular form, expanding to accommodate up to twelve diners, primarily constructed from mahogany and rising from an incurved quadripartite base carved with foliates and set with a central carved finial, supported on oblate lobed and reeded bun feet; the top having a running ovolo moulding to the edge to which can be added a set of arc-shaped leaves of mahogany and inlaid ebony, increasing its circumference.
English, circa 1820
